Partnering with Mobility Resellers to deliver Enterprise Mobility Solutions

Common Mobility Reseller concerns

- Onboarding new technologies to address customers' current challenges
- Designing and building custom mobile solutions
- Deploying new technologies in customer environments
- Ongoing technical support for customer solutions

Who We Are

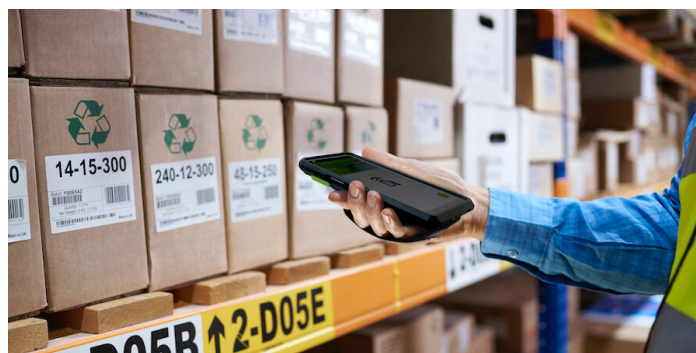

E7CORE is a team of application designers, software developers, and project managers specializing in mobile enterprise computing solutions across various vertical markets.

We bridge the gap between enterprise and mobile applications, device manufacturers, and resellers to deliver the mobile solution your clients require.

Why E7CORE?

- ✓ **Expert Guidance:** Experienced team for installation and migration for best-in-class implementation.
- ✓ **Increased Profitability:** Skilled services without the costs of maintaining internal resources.
- ✓ **Scalability:** Broad and capable team that enables your business to meet the needs of your clients.
- ✓ **Efficiency:** Experience, processes, and tools to deliver projects at an accelerated pace.
- ✓ **Tailored Support:** Customized services based on your specific needs, with long-term support.
- ✓ **Non-competitive:** Focused on delivering professional services without selling software licenses or hardware, ensuring unbiased and tailored solutions for your business needs.

Markets Served: Warehouse/distribution, logistics, retail, healthcare, manufacturing, field service.

Key Service Offerings

Service	Description	Typical Outcomes
